 FIRE-LITE® ALARMS
by Honeywell

New MS-25 Addressable Panel Released

June 15, 2010
Document FLPA10-06-1

Fire-lite Alarms is introducing a “right sized” 25-point fire alarm control panel with all the high-tech benefits of its “big brother” addressable products, but in the cost range of a conventional system. The new MS-25 fire alarm control panel and its compatible line of new HFS addressable devices join Fire-Lite’s award-winning and non-proprietary family of products that offer innovative features, ease of installation and cost-effective solutions, supported by the best training program in the industry.

This small addressable system is worth serious consideration for applications where two to five zone conventional fire alarm systems traditionally are used. The MS-25 introduces a feature set that is new to this segment: pin-point identification of alarms and troubles, false alarm prevention via detector drift compensation and automatic maintenance alerts. Real installer benefits such as easy code-wheel addressed detectors; a “JumpStart” programming feature and a built-in programming browser make system commissioning a definite time-saver. In addition to supporting any combination of addressable HFS detectors and modules, along with the BG-12LX manual pull station, this system also utilizes a single loop of standard wire for real cost-savings.

Ordering Information:

Part Number	Description
MS-25	Includes main circuit board with display, transformer, backbox with door, manual, and required screws, cables, key, etc. Red, 120 VAC
MS-25E	Same as MS-25 , but operates from 220/240 VAC
HFS-P	Honeywell Fire Systems addressable photoelectric smoke detector. Includes base
HFS-PT	Honeywell Fire Systems addressable photoelectric smoke detector with thermal sensor. Includes base
HFS-T	Honeywell Fire Systems addressable fixed temperature heat detector. Includes base
HFS-MM	Honeywell Fire Systems addressable Mini-Monitor module for normally-open contact devices
HFS-MR	Honeywell Fire Systems addressable relay module
HFS-D	Honeywell Fire Systems addressable photoelectric duct smoke detector. Includes detector
BG-12LX	Addressable dual-action manual pull station
